Introduction

Flexera’s Software Vulnerability Manager (formerly called Software Vulnerability Manager 2019) is a vulnerability and patch management software solution that facilitates a customized patch management process. It combines vulnerability intelligence, vulnerability scanning, and patch creation with patch deployment tool Integration to enable targeted, reliable, and cost-efficient patch management.

Vulnerability and patch management are critical components of any security infrastructure because they enable proactive detection and remediation of vulnerabilities before they are actively exploited and your security compromised. With Software Vulnerability Manager, IT operations and security teams are empowered to prevent vulnerability threats from both Microsoft and non-Microsoft (third-party) product vulnerabilities, covering Microsoft Windows, macOS, and Red Hat Enterprise Linux.

Software Vulnerability Manager integrates seamlessly with Microsoft® WSUS and System Center Configuration Manager.
New Features and Enhancements

Software Vulnerability Manager (Cloud Edition) includes the following new features and enhancements:

- Disable report options based on report format
- Added CVSS Score to the CSV Reports

*Note* • To see the following new features and enhancements in your Software Vulnerability Manager (Cloud Edition) interface, you must refresh your browser’s cache (press Ctrl+F5).

Disable report options based on report format

With this new enhancement, Executive Summary Report, Dashboard Profiles, Site Level Statistics, and Overall Summary Statistics Check box for both Host Level Statistics and Product Level Statistics are disabled when you select report format as CSV.

![Select Report as CSV](image)

*Figure 1:* Select Report as CSV

Insecure Installation Details for both Host Level Statistics and Product Level Statistics are enabled only when you select Add Product Details and Add Host Details respectively.
Figure 2: Select Add Host Details and Add Product Details respectively

**PDF Filename** tab and **Publish Report Parameters** sections are disabled when you select report format as CSV.

Figure 3: PDF Filename and Publish Report Parameters fields are Disabled

**Added CVSS Score to the CSV Reports**

With this new enhancement, a new CVSS column has been added to the CSV Reports.
Resolved Issues

The following table lists the customer issues that were resolved in Software Vulnerability Manager (Cloud Edition):

<table>
<thead>
<tr>
<th>Issue</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IOJ-2098888</td>
<td>Enhanced Advisories smart group grids to search with SAID and Advisory Description. CVE Search already available.</td>
</tr>
<tr>
<td>IOJ-2118632</td>
<td>Fixed email not triggering after completing external package signature.</td>
</tr>
</tbody>
</table>
