Introduction

Flexera's Software Vulnerability Manager is a software vulnerability and patch management solution that facilitates a customized patch management process. It combines vulnerability and threat intelligence, end point assessment, and patch creation and publishing enable an informed and rapid patch management.

Software Vulnerability Manager can assess software vulnerabilities for both Microsoft and non-Microsoft (third-party) product vulnerabilities covering Microsoft Windows, macOS, and Red Hat Enterprise Linux. The results of this assessment are connected to our vulnerability and threat intelligence to allow for effective prioritization. Finally, third party patches may be created and published to remediate endpoints using Microsoft® WSUS (often in conjunction with System Center Configuration Manager), via Microsoft® Intune or VMware® Workspace One.

New Features and Enhancements

Software Vulnerability Manager (Cloud Edition) includes the following new features and enhancements:

- [Updated Software Vulnerability Manager User Interface](#)
- [Binary Versions](#)

Note • To see the following new features and enhancements in your Software Vulnerability Manager (Cloud Edition) interface, you must refresh your browser's cache (press Ctrl+F5).

Updated Software Vulnerability Manager User Interface

This update presents Software Vulnerability Manager with a new, refreshed and modern user interface. While the overall layout, menu options and their placement in the user interface almost remain the same, there are couple of significant improvements added, like clicking on a menu item opens a new tab within the SVM console for easy navigation and a new URL.

For more details on the new user interface and FAQ, [click here](#).

Binary Versions

The following version of the binaries provided are:

- SVM ActiveX Plug-in v7.6.0.18 (no change)
- Single Host Agent v7.6.0.18 (no change)
- SVM Daemon v7.6.0.18 (no change)
- SVM System Center Plugin v7.6.0.18 (no change)
- SVM Patch Publisher v6.0.547 (to download, [click here](#)) (no change)
- SVM Cloud Client Toolkit v5.0.561 (to download, [click here](#)) (no change)

This toolkit contains offline utilities such as the Multi-partition Reporting Tool, WSUS Management Tool and Client Data Tool which add value to SVM. This toolkit does not consists of Patch Daemon. This toolkit is for SVM Cloud edition only.

Patch Daemon will be deprecated in the future; therefore, you are encouraged to migrate to the new SVM Patch Publisher tool.

- SVM On-Prem Client Toolkit v5.0.547 (to download, [click here](#)) (no change)

This toolkit contains Patch Daemon and offline utilities such as the Multi-partition Reporting Tool, WSUS Management Tool and Client Data Tool which add value to SVM.

Known Issues

The following table lists the known issues in Software Vulnerability Manager (Cloud Edition):

Issue	Description
IOJ-2230820	Password expiration policies should not be enforced for SSO.

Resolved Issues

The following table lists the customer issues that were resolved in Software Vulnerability Manager (Cloud Edition):

Issue	Description
IOJ-2201813	An error message while subscribing to VPM Package - “Not able to subscribe package's please try again”.
IOJ-2231942	Smart groups are not loading for very large dataset.
