Introduction

Flexera’s Software Vulnerability Manager (formerly called Software Vulnerability Manager 2019) is a vulnerability and patch management software solution that facilitates a customized patch management process. It combines vulnerability intelligence, vulnerability scanning, and patch creation with patch deployment tool integration to enable targeted, reliable, and cost-efficient patch management.

Vulnerability and patch management are critical components of any security infrastructure because they enable proactive detection and remediation of vulnerabilities before they are actively exploited, and your security compromised. With Software Vulnerability Manager, IT operations and security teams are empowered to prevent vulnerability threats from both Microsoft and non-Microsoft (third-party) product vulnerabilities, covering Microsoft Windows, macOS, and Red Hat Enterprise Linux.

Software Vulnerability Manager integrates seamlessly with Microsoft® WSUS and System Center Configuration Manager via Microsoft® Intune, VMware® Workspace One, BigFix, or Tanium.

SVM Patch Publisher inherits its current functionalities from the Patch Daemon. SVM Patch Publisher enables you to configure connections to the SVM server and to the supported end point management systems. The tool polls SVM on a configured frequency to look for new patches resulting either from a manual publishing or Patch Automation to publish patches to the specified end point management system.

New Features and Enhancements

In this update, we have fixed a product defect that originated in the previous build (July release) 7.6.1.33-1.

Reference: Latest OnPrem Builds

The following build versions are available:

- RPM Builds
 - RHEL 8— `csi-7.6.1.33-2.el8.x86_64.php7.rpm`
 - RHEL 9— `csi-7.6.1.33-2.el9.x86_64.php8.rpm`
- Oracle Linux 9 Virtual Appliance for VMware, Hyper-V, and Red Hat OpenShift (No change)
 - `svm-appliance-7.6.1.30-570f28b-hyperv.zip` (To update, follow the [Software Updates](#) process)
 - `svm--appliance-7.6.1.30-570f28b.ova` (To update, follow the [Software Updates](#) process)

Reference: Latest Binary Versions

The following version of the binaries provided are:

- SVM ActiveX Plug-in— v7.6.1.29 (No change)
- Single Host Agent— v7.6.1.29 (No change)
- SVM Daemon— v7.6.1.29 (No change)
- SVM System Center Plugin— v7.6.1.29 (No change)
- SVM Patch Publisher— v7.27.1964 (to download, [click here](#)) (No change)

Note • Customers using Workspace One can skip this Patch Publisher release.

- SVM On-Prem Client Toolkit— v5.0.1926 (to download, [click here](#))

Note • On September 23, 2024, digital signing updates were released for SVM Patch Publisher (version 7.22.1546) and SVM On-Prem Client Toolkit (version 5.0.1546).

Resolved Issues

The following table lists the customer issues that were resolved in this release of Software Vulnerability Manager (On-Premises Edition):

Issue	Description
IOK-1422081	In SVM OnPrem, Silent parameters are missing for VPM subscription.
IOK-1411877	Subscribed packages are not picked by Patch Publisher for publishing to WSUS connection. Issue only for rpm version 7.6.1.33-1 and previous builds are not impacted.
