# FlexNet Manager for Engineering Applications 2022 R2 Database Schema

The data underlying FlexNet Manager for Engineering Applications is arranged in a number of distinct databases. Most frequently these databases live within a single database server, although in very large scale implementations, it is possible to implement them across multiple servers. The FlexNet Manager for Engineering Applications Database Schema provides schema information on the following tables:

**Table 1-1 •** FlexNet Manager for Engineering Applications Database Schema

| Topic | Content |
|---|---|
| **Admin.Common Tables** | Describes the database columns in the FlexNet Manager for Engineering Applications **Admin.Common** tables. |
| **Platform.Common Tables** | Describes the database columns in the FlexNet Manager for Engineering Applications **Platform.Common** tables. |
| **Reporting.Common Tables** | Describes the database columns in the FlexNet Manager for Engineering Applications **Reporting.Common** tables. |
