1	Hardware Assets	Some assets cannot be linked to an inventory device	IOJ-1864895	The asset can be linked if you add the link from the asset record rather than the inventory record. Open the asset from 'All assets' page, then set the 'Linked inventory device' field.
1	Contracts	Linked Assets and Licenses may be deleted from a Contract when saving Contract properties	IOJ-1865851	
2	Operators, rights and roles	Edit icon incorrectly displays when the 'Rename an existing role' option for a Role is restricted	IOJ-1733057	
2	Beacon engine, Inventory Beacon, Security	ActiveDirectoryImport.exe is called by BeaconEngine.exe using plain text passwords in command line	IOJ-1864172	A workaround to collect data is to schedule AD import using MS task scheduler and specify the domain account to query AD data for the MS schedule task. This prevents the password from being exposed by using the user specified to run schedule task.
2	Inventory	Locally-installed FlexNet inventory agent does not support inventory of Oracle 12c pluggable databases	IOJ-1754077	On-premises customers may apply FlexNet Manager Suite Hotfix 2018R1-02, which includes the repair of this issue. This is available from the Product and License Center (accessible through the Customer Community portal, with login required). Customers using a cloud implementation may ask their Flexera Support representative to request that their FlexNet inventory agent maximum version is increased to 13.0.1 (or later). Alternatively, you can use remote oracle inventory (direct oracle inventory) and specify each pluggable database as separate SID/Service in the TNSNames files on the beacon to collect data from each pluggable database along with instance.

2	Inventory Beacon	A child inventory beacon does not download adoption and upgrade packages completely from the parent inventory beacon	IOJ-1742927	Workaround: OPTION 1: 1: On the parent beacon: Extract the attached "FNMS-64079_Beacon_AuthcodeWorkaround_0.1.9.zip" to a folder, such as the desktop. 2: Open a command prompt (or PS window) as administrator and change to the root folder where the files were extracted with cd "C:\users\myuser\desktop\FNMS-64079" 3: Use the following to run: PowerShell -ExecutionPolicy Unrestricted -File ".\Hotfixes\FNMS-64079_Beacon_ AuthcodeWorkaround.ps1" 4: Wait 15 - 30 mins for the child beacons to re-attempt download. OPTION 2: Move child beacon to a parent beacon (by downloading another Configuration File without setting a Parent Beacon) to download packages. You can move it back to child again when required inventory agent package downloaded. OPTION 3: The complete Packages folder can be copied manually from Parent Beacon to Child Beacon, where the packages will be functional/usable but the alerts/errors will still be visible: C:\ProgramData\Flexera Software\Staging\Common\Packages\ OPTION 4: On the Parent Beacon only, copying the actual authenticode file from a cached folder and renaming it. This is time consuming, but will allow the Child Beacon to natively download all what it wants: 1: Open two Windows Explorer on the Parent Beacon and navigate to these two folders on each window: ProgramData\ Flexera Software\Distribution\Cache\Common and ProgramData\ Flexera Software\Staging\Common\Packages\Flexera\Adoption\ LatestVersion Open each Agent flavor folder in the 2nd link and open the corresponding cached folder on the first link 2: Copy the authcode.cab file from the first link to second link, then rename it exactly like the file ending in metapkg.ndc.gz but using .cab instead of .gz. Example: Copy ProgramData\ Flexera Software\Distribution\Cache\Common\ Package_Flexera_Adoption_12.4.0_Rev1.0_FlexNet Inventory Agent_FlexNet Inventory Agent\authcode.cab TO ProgramData\ Flexera Software\Staging\Common\Packages\Flexera\Adoption\

12.4.0\Rev1.0\FlexNet Inventory Agent\FlexNet Inventory Agent_metapkg.ndc.cab

3: Do the same processes with the Inventory Beacon's upgrade package. Example: ProgramData\Flexera Software\Distribution\Cache\Common\Package_Flexera_Upgrade_12.4.0_Rev1.0_Flexera Inventory Beacon Upgrade_Flexera Inventory Beacon Upgrade\authcode.cab TO ProgramData\Flexera Software\Staging\Common\Packages\Flexera\Upgrade\12.4.0\Rev1.0\Flexera Inventory Beacon Upgrade\Flexera Inventory Beacon Upgrade_metapkg.ndc.cab

4:Restart the FlexNet Beacon Engine service on the Child Beacon and it should be able to download all files

2	Resolvers and Importers	Inventory resolver does not delete ServiceComponent if it is the only component reported by oracle inventory	IOJ-1896162	Delete the device (through All Inventory page) that has that only one component and when the Oracle inventory (without component) reported by that device again it would not create component as it does not exist in the ndi. Warning: Making any changes to the web.config file will cause the AppPool to restart. Any active users that are currently using the Web UI may be interrupted and any long running processes such as reports will be aborted. It is recommended that this is done out of operation hours. Warning: Making changes to the web.config file can cause the WebUI to fail to start up and stop working. Before making any changes, ensure you have backed up the web. config file to another location. To make this change: - Open notepad.exe in Administrator mode - Using notepad, Open the web.config file found in the WebUI folder of the Flexnet Manager Platform install folder (default location is "c:\Program Files (x86)\Flexera Software\FlexNet Manager Platform\WebUI") - Search for the lines that starts with '<add key="aspnet:MaxHttpCollectionKeys"'. This will be under the "<appSettings>" XML node. If more than one is found, remove the duplicate entry (the entire line). - Save the file and close notepad. It is recommended that after a change is made to the web.config file, a full IIS restart is made. To do this, either restart from IIS OR through command-line on the presentation server open a command prompt window in Administration mode and run type "iisreset /restart" (ignore quotes) and press enter. All sites hosted by your IIS instances will be restarted, so it is recommended that this is done outside of normal operation hours.
