Please follow the attached Oracle_Import_Workaround Steps.docx which explains in detail.

2	Agent	Inventory agent may hang if oracle database is not in healthy state	IOJ- 1910504	Fix the Oracle database to execute queries successfully.

2	Import	IM hardware reader may take hours	IOJ- 1907816	
2	Import	Office 365 inventory import is not reliably collecting all usage information	IOJ- 1827747	Workaround: The offending code is often the usage command. These can be removed from the adapter by updating the readerV2.config. Usage information will not be available but the entitlement data is still retrieved. Cloud customers can do the same update but must do so in a custom adapter so that the changes are not overwritten by the adapter downloads to the Beacon. Remove the Usage.xml line from the config file: <readers> <reader filename="User.xml" procedurename="Computer"></reader> <reader filename="InstallerEvidence.xml" procedurename="Evidence"></reader> <reader filename="License.xml" procedurename="LicenseCreateUpdate"></reader> <reader filename="License.xml" procedurename="LicenseCreateUpdate"></reader> <reader filename="License.xml" procedurename="LicenseCreateUpdate"></reader> </readers>

2	Specialist	Powershell based adapters can insert data into FNMS that exceeds the defined	IOJ-	If possible please modify the usernames such that they are less than or equal to 64
2	Integrations	column length	1894888	characters in length.

2	Beacon engine	FlexNet Beacon may not serve policy to inventory agent when IBM PVU mode is enabled	IOJ- 1778559	Run the following SQL on Compliance database to update the targetting from by name to IP. Declare @targetID int; Select @targetID = beacontargetID from BeaconTarget where Name = 'All devices consuming IBM PVU points' if exists (select BeaconTargetID from BeaconTargetPropertyValue where BeaconTargetID = @targetID and KeyName = 'BTargetingTargetingRules') update BeaconTargetPropertyValue set Value = 1 where BeaconTargetID = @targetID and KeyName = 'BTargetingTargetingRules' else insert into BeaconTargetPropertyValue (BeaconTargetID, KeyName, Value, TenantID) Values (@targetID, 'BTargetingTargetingRules', 1, 1)
2	Software Assets	Accepting application removal recommended license changes does not update license application list	IOJ- 1898509	The following hotfixes are available from Flexera's Product and License Center: * FlexNet Manager Suite Hotfix 2018R2-04 * FlexNet Manager Suite Hotfix 2018R1-07 * FlexNet Manager Suite Hotfix 2017R3-01 * FlexNet Manager Suite Hotfix 2017R2-01 Without these hotfixes, manually removing the application from the license will stop the recommended license change from continually appearing.

3		Solaris host would not consume points if global zone inventory is missing	IOJ- 1836012	
4	Beacon UI	Default schedule "AWS imports" is not created if schedule.xml already exists during upgrade	IOJ- 1907285	Delete the schedule.xml file or create the "AWS imports" schedule manually.

2	Inventory Beacon	Co-installed inventory beacon will only import active directory data from a domain beacon is connected to	IOJ- 1926818	Use remote beacon to import active directory data from other domains
2	Inventory Beacon	SAPReader.exe fails when an Admin Module and Dependent SAP systems are added to the Beacon out of sequence	IOJ- 1878631	 Make sure you have the credentials available for your SAP Admin Module. Take screenshots of the SAP Systems list and delete them all and re-add them, starting with the Admin Module on top when re-adding. Note: The deletion does NOT remove any data from FNMS, as the Beacon is only responsible for scheduling the inventories.

2	Inventory Beacon	A child inventory beacon does not download adoption and upgrade packages completely from the parent inventory beacon	IOJ- 1742927	 OPTION 1: On the parent beacon: Extract the attached "FNMS 64079_Beacon_AuthcodeWorkaround_0.1.9.zip" to a folder, such as the desktop. Open a command prompt (or PS window) as administrator and change to the root folder where the files were extracted. with cd "C:\users\myuser\desktop\FNMS 64079" Use the following to run: PowerShell -ExecutionPolicy Unrestricted -File ".\Hotfixes\FNMS 64079 _Beacon_AuthcodeWorkaround.ps1" Wait 15 - 30 minutes for the child beacons to re-attempt download. OPTION 2: Move child beacon to a parent beacon (by downloading another Configuration File without setting a Parent Beacon) to download packages. You can move it back to child again when required inventory agent package downloaded. OPTION 3: The complete Packages folder can be copied manually from Parent Beacon to Child Beacon, where the packages will be functional/usable but the alerts/errors will still be visible: C:\ProgramData\Flexera Software\Staging\Common\Packages\ OPTION 4: OPTION 4: On the Parent Beacon only, copying the actual authenticode file from a cached folder and renaming it. This is time consuming, but will allow the Child Beacon to natively download all what it wants:
				 Open two Windows Explorer on the Parent Beacon and navigate to these two folders on each window: ProgramData\Flexera Software\Distribution\Cache\Common and ProgramData\Flexera Software\Staging\Common\Packages\Flexera\Adoption\Latest\Version Open each Agent flavor folder in the 2nd link and open the corresponding cached folder on the first link. Copy the authcode.cab file from the first link to second link, then rename it exactly like the file ending in metapkg.ndc.gz but using .cab instead of .gz. Example: Copy ProgramData\Flexera Software\Distribution\Cache\Common\ Package_Flexera_Adoption_12.4.0_Rev1.0_FlexNet Inventory Agent_FlexNet Inventory Agent\authcode. cab TO ProgramData\ Flexera Software\Staging\Common\Packages\Flexera\Adoption\12.4.0\Rev1.0\FlexNet Inventory Agent\FlexNet Inventory Agent_ metapkg.ndc.cab Do the same processes with the Inventory Beacon's upgrade package. Example: ProgramData\Flexera Software\Distribution\Cache\ Common\Package_Flexera_Upgrade_12.4.0_Rev1.0_Flexera Inventory Beacon Upgrade_Flexera Inventory Beacon Upgrade\uthcode.cab TO ProgramData\Flexera Staging\Common\Packages\Flexera\Upgrade\12.4.0\Rev1.0\Flexera Inventory Beacon Upgrade_authcode.cab TO ProgramData\Flexera Staging\Common\Packages\Flexera\Upgrade\12.4.0\Rev1.0\Flexera Inventory Beacon Upgrade\uthcode.cab TO ProgramData\Flexera Staging\Common\Packages\Flexera\Upgrade\12.4.0\Rev1.0\Flexera Inventory Beacon Upgrade_metapkg.ndc.cab Restart the FlexNet Beacon Engine service on the Child Beacon and it should be able to download all file

Unresolved issues in release 2018 R2

Severity	Component (s)	Summary	Master Issue Number	Workaround
1		Beacon PowerShell configuration impossible with Spanish language settings on Beacon server	IOJ- 1901036	
2	Activity Log and System tasks, Batch Scheduling	Manually submitting as task "POlineImport" to batch scheduler may cause the System Tasks page to fail	IOJ- 1744350	
2	Agent, Remote execution	Oracle inventory may not return EBS applications inventory if multiple nodes targeted by the same rule	IOJ- 1888512	This only happens when you have 20K users assigned to multiple EBS applications and you target multiple nodes within the same rule. Create one rule for each node in a cluster and schedule to run in sequential order.
2	Agent	Attempting to downgrade the installed version of FlexNet inventory agent with third-party tools leaves the agent non-functional	IOJ- 1809619	Re-install by running the MSI or installing the new version again restores the files.
2	Agent	FlexNet inventory agent reports discovered Oracle listener, based on hostname rather than bound network interface controller DNS name	IOJ- 1740259	
2	Batch Scheduling	Bug: Batch Processor status processing and success come back in reverse order	IOJ- 1919441	
2	Batch Scheduling	Pending tasks are not transferred to the message queue when upgrading FlexNet Manager Suite	IOJ- 1725527	
2	Batch Scheduling	Unable to schedule remote receives using child batch server	IOJ- 1737873	
2	Batch Scheduling	Batch scheduler fails when two accounts are used to separate FlexNet Manager Suite operation from data collection services	IOJ- 1728113	
2	Beacon engine	Policy revision number is very frequently incremented when using FlexNet Beacons earlier than 2017 R3 and older beacons fail policy signature check	IOJ- 1895994	Upgrade all beacons to release 2018 R2. The minimum compatible Beacon release is 2017 R3.
2	Beacon engine	Beacon reports no policy if agent is installed on the beacon	IOJ- 1741388	
2	Business Adapter	Inventory beacon expects business adapter file name and import type name to be same	IOJ- 1666793	
2	Business Adapter	Performing a repeated Business Import of .csv files may result in a crash	IOJ- 1738442	
2	Business Adapter	Business Importer SAPSystem import crashes when landscape information is missing	IOJ- 1738054	

2	Business Adapter	Business Importer incorrectly requires SAP field 'FastManageSoftSAPTransactionProfileObject' which is actually a custom property	IOJ- 1739106	
2	Business Adapter	The schema.ini file is deleted when a Business Import is run to import data from a text file	IOJ- 1737437	I went into the xml file and made the highlighted [JT: added Delimiter="None" attribute, and added ;FMT=Delimited(None)] in the connection string) adjustments. After that is does not matter where I run the adaptor the scheme.ini is not deleted. <import <br="" delimiter="None" enabled="False" name="Purchase" template="" type="CSV">ConnectionString="Provider=Microsoft.Jet.OLEDB.4.0;Data Source=C:\PJM\SAP;Extended Properties='text;HDR=Yes;FMT=Delimited(None)" Query="select * from [Flex.txt]" FileName="C:\PJM\SAP\Flex.txt" UsePhysicalTable="True" /> AFAIK, changing the attribute stops MGSBI from deleting the file, and the ConnectionString change stops the BAS from inferring it.</import>
2	Business Adapter	The Business Importer password is shown in plain text in the simulation UI if the import source is ODBC	IOJ- 1739487	
	Business Adapter	Business Importer may truncate a long SAP role name without displaying an error	IOJ- 1739470	Limiting the role name to 32 characters.

2	Contracts	A scoped operator may receive an error when searching for contracts	IOJ- 1724716	
2	Database	Upgrading from FlexNet Manager Platform 9.2 to FlexNet Manager Suite, the error message "Not all objects are owned by dbo" may be encountered during the database migration step.	IOJ- 1761482

Warning: Making any changes to the web.config file will cause the AppPool to restart. Any active users that are currently using the Web UI may be interrupted and any long running processes such as reports will be aborted. It is recommended that this is done out of operation hours. Warning: Making changes to the web.config file can cause the WebUI to fail to start up and
				stop working. Before making any changes, ensure you have backed up the web.config file to another location. To make this change:
				 Open notepad.exe in Administrator mode Using notepad, Open the web.config file found in the WebUI folder of the Flexnet Manager Platform install folder (default location is "c:\Program Files (x86)\Flexera Software\FlexNet Manager Platform\WebUI") Search for the lines that starts with '<add .="" be<br="" key="aspnet:MaxHttpCollectionKeys" this="" will="">under the "<appsettings>" XML node. If more than one is found, remove the duplicate entry (the entire line).</appsettings></add> Save the file and close notepad.
				It is recommended that after a change is made to the web.config file, a full IIS restart is made. To do this, either restart from IIS OR through command-line on the presentation server open a command prompt window in Administration mode and run type "iisreset /restart" (ignore quotes) and press enter. All sites hosted by your IIS instances will be restarted, so it is recommended that this is done outside of normal operation hours.
