

Report Definition Flexera SaaS Manager Worker Data

Report Name	Flexera SaaS Manager Worker Data
Report Type	Advanced
Data Source	All Workers
Data Source Type	Standard
Primary Business Object	Worker

Additional Info

Data Source Description Accesses the Worker as its primary object and returns one row per worker. Includes all workers even workers to be hired in the future. Does not contain any built-in prompts. This data source can be used to build reports on all workers. Helpful Tips - 1) If the worker is hired in the future, all fields will be returned based on the effective date. 2) If no effective date is specified, the system will use the current date as the effective date. 3) If the effective date is less than the worker's hire date, no effective dated information (such as position information, compensation information and so on) will be returned. 4) If effective dated behavior is desired, use the "All Active and Terminated workers" data source instead.

Columns

Business Object	Field	Column Heading Override	Column Heading Override XML Alias	Format	Options
Worker	Employee ID	UserID	UserID		
Worker	Email - Primary Work	Email	Email		
Worker	Email - Work	EmailAliases	EmailAliases
