Introduction

Flexera SaaS Manager integrates with a large group of SaaS applications, providing unparalleled business intelligence about when and how your users are interacting with the SaaS products licensed within your organization. Flexera SaaS Manager helps you discover, manage, optimize, and secure your SaaS subscriptions and identifies any unused, underused, or abandoned licenses, helping you rein in runaway spend.

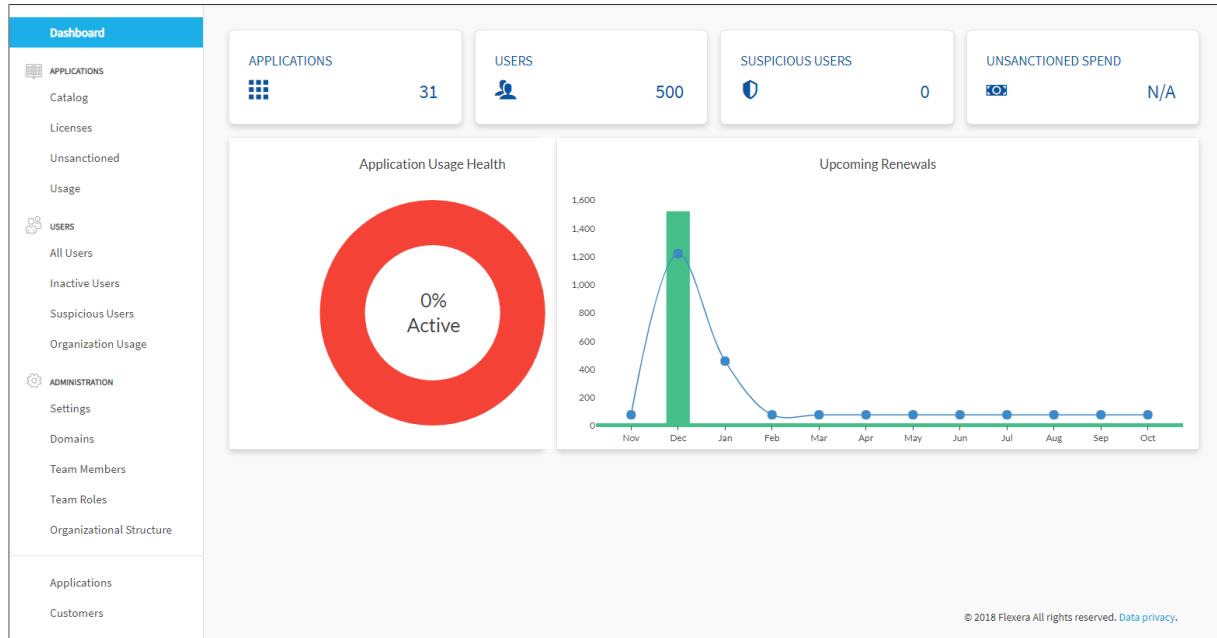

New Features and Enhancements

This release of Flexera SaaS Manager includes the following new features:

- [Rebranding and Layout Improvements](#)
- [Pagination Options Added to Improve Page Loading Performance](#)
- [Ability to Export Table Data](#)
- [New Customer Domains Page Allows Entry of Multiple Domains per Organization](#)
- [Support for Multiple Email Domains](#)

Rebranding and Layout Improvements

Flexera SaaS Manager is now updated to align with Flexera branding, providing a common look and feel across all Flexera products.

As part of these changes, the Flexera SaaS Manager application now includes many layout improvements and interface updates to conform to brand:

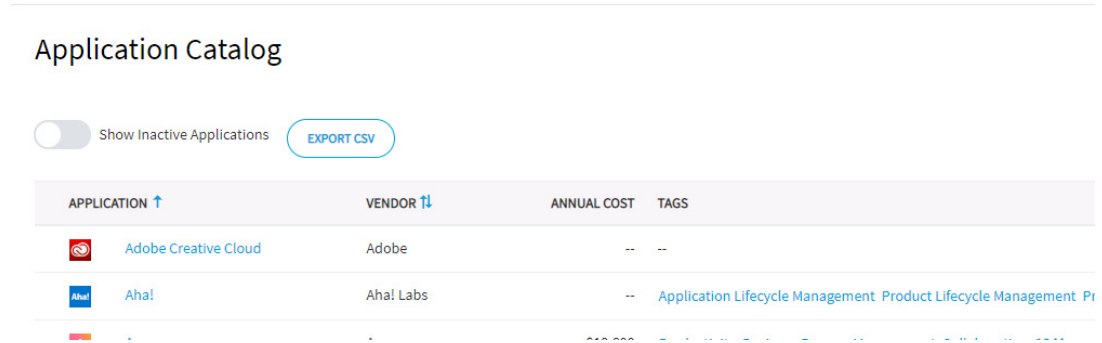

- Left navigation provides ease of use, allowing you to see all navigation items without having to click.
- System email templates have been updated.
- The My Account and the Help Center links are now icons at the top right of the application.
- Fonts and link styles have been updated to improve readability.
- Button styling has been updated to reflect new visual styling standards.
- The search box now includes an “X” after search results have been returned so that you can clear search terms with one click. In addition, the message that appears when there are no matching search results has been improved for clarity.
- Style updates have been made to grids.

Pagination Options Added to Improve Page Loading Performance

Pagination has been added to the **Suspicious Users** page and the **Inactive or Abandoned Accounts** page to provide faster page loading and to be consistent pagination provided throughout the application. Previously, the entire data content of these pages was being loaded into a single page. Adding pagination allows quicker parsing and rendering of the content.

Ability to Export Table Data

All tables in Flexera SaaS Manager now provide you the ability to export to CSV. An **Export CSV** button appears at the top of the table as shown in the following example from the Application Catalog table.

New Customer Domains Page Allows Entry of Multiple Domains per Organization

Flexera SaaS Manager now provides the ability for you to add multiple corporate email domains. Previously, only one domain was allowed. Logins from any of the added domains is supported. A new **Customer Domains** page lets an administrator define all of your organization's domains.

Support for Multiple Email Domains

If a single user logs in to varying SaaS applications using different email domains, the activity reports received from those applications are now tied to the same user.

Resolved Issues

The following table lists the customer issues that were resolved in Flexera SaaS Manager:

Issue	Description
FSM-254	User Roster export is not executing. When the export is clicked, the screen attempts to load continuously without downloading the roster.
FSM-250	The All Users page shows incorrect values per user in the Annual Spend column.
FSM-298	Netsuite integration error due to integration connecting to incorrect data center.
FSM-249	The UNSANCTIONED SPEND total on the dashboard does not match the detailed line items total.
FSM-402	Bugsnag Integration error.
