Introduction

Software Vulnerability Research provides access to verified intelligence from Secunia Research, covering all applications and systems across all platforms. Prioritization is driven by threat intelligence, workflows, tickets and alerts, and describes the steps to mitigate the risk of costly breaches. You stay in control and hackers stay out. For more information, see https://www.flexera.com/products/operations/software-vulnerability-research.html
New Features and Enhancements

This Software Vulnerability Research update includes the following:

- **Added New Status Column in the Suggest Software page**
- **Enhanced Product API**

**Added New Status Column in the Suggest Software page**

In this update a new **Status** column has been added to the Suggest Software page. The **Status** column displays the status of your software suggestion requests. A status of **Completed** indicates that the suggested software is added to SVR.

**Enhanced Product API**

The Product Release (/api/product-releases/) and Product Full Version (/api/product-fullversion/) APIs will now return a new data column **vt_id**. The **vt_id** is an internal unique identifier assigned to each product in SVR.
System Requirements

Software Vulnerability Research’s user interface will resize and adapt when being used on different devices. You can access the system from anywhere using any device, such as a smartphone or tablet, running Microsoft Edge, Chrome, Opera, Firefox, Safari and mobile browsers with an Internet connection capable of connecting to https://app.flexerasoftware.com.

Resolved Issues

The following table lists the customer issues that were resolved in Software Vulnerability Research:

<table>
