Software Vulnerability Research Release Notes

September 2020

Introduction

Software Vulnerability Research provides access to verified intelligence from Secunia Research, covering all applications and systems across all platforms. Prioritization is driven by threat intelligence, workflows, tickets and alerts, and describes the steps to mitigate the risk of costly breaches. You stay in control and hackers stay out. For more information, see https://www.flexera.com/products/operations/software-vulnerability-research.html
New Features and Enhancements

This Software Vulnerability Research update includes the following:

- Email Warning before Policy Breach
- Renamed Whitelist / Blacklist to Allow List / Block List
- API User Management Role Access to the User Data
- Enforced Special Characters for the Password

Email Warning before Policy Breach

With this new feature, you will be able to send a policy breach warning emails for applicable open or waiting tickets. This warning can be configured for priority based rule of the policy and will enable the ticket assignees to prioritize their tickets. You will be able to configure the number of days before the policy breach, to send such a warning.

For more details, see Policies.

Renamed Whitelist / Blacklist to Allow List / Block List

With this update, terms Whitelist / Blacklist has been renamed to Allow List / Block List respectively.
For more details, see Add Custom Scan Paths

### API User Management Role Access to the User Data

With this update, users with API User Management Role will now be able to access the user data using the API - https://api.app.flexerasoftware.com/api/users/

### Enforced Special Characters for the Password

With this update, passwords will require at least one special character. This will apply to new user setup, password reset, and forgot passwords.

### System Requirements

Software Vulnerability Research’s user interface will resize and adapt when being used on different devices. You can access the system from anywhere using any device, such as a smart phone or tablet, running Internet Explorer 11 or higher, Chrome, Opera, Firefox, Safari and mobile browsers with an Internet connection capable of connecting to https://app.flexerasoftware.com.

### Resolved Issues

The following table lists the customer issues that were resolved in Software Vulnerability Research:

<table>
<thead>
<tr>
<th>Issue</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IOJ-02203019</td>
<td>Enforced SSO login for non-root user if standard login disabled. A bug that allowed the user with multiple roles to use standard login even though it disabled for SSO is fixed.</td>
</tr>
</tbody>
</table>
